

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

§ 318. **Florida Plants.**—We have had several applications for information where to purchase herbarium specimens of the rarer Southern plants, particularly ferns. Miss Mary C. Reynolds, St. Augustine, Florida, has recently sent us some nice specimens of *Nymphaea flava*, *Psilotum triquetrum*, *Polypodium Phyllitidis*, *P. aureum*, *P. pectinatum*, *P. Plumula*, *Adiantum tenerum*, *Vittaria lineata*, &c., and informs us that she has these and other Southern plants to dispose of at very reasonable prices. Of *Polypodium Phyllitidis* she writes that her brother obtained from a locality on Indian River fronds from two to four feet long. They grew on the earth-laden spurs of a Live-oak which was *twenty feet* in circumference.

§ 319. **Cyperus cylindricus**, *Mariscus cylindricus*, Ell.—As long ago as 1866 a *Cyperus* was gathered near Tottenville, Staten Island, which seemed quite distinct from *C. ovularis*, Torr., chiefly in its smaller, more cylindrical heads. Mr. N. L. Britton has again collected this plant in the same spot, and on comparing it with the specimens in the Torrey Herbarium finds it most nearly corresponding with Elliott's *Mariscus cylindricus*. It may be that this plant has been gathered by others in some other spot. At all events, it is to be looked for this season. Mr. Britton or the editor would be thankful for specimens, if it should turn up any where else.

Note to § 309, Vitis.—*V. cordifolia* flowered this year in the last week of May, about 4-6 days before *Ailantus* bloomed. Last year I stated that it flowered with the opening of *Ailantus* blossoms.

Vitis aestivalis is with us always the latest, and blooms some 4-6 days after *cordifolia* in the same localities. G. E.

Terms—One Dollar per annum beginning with the January number. For the *Botanical Directory* 40 cents; three copies for one dollar, or twelve for three dollars. Vols. I.-V., with index, and photograph of Dr. Torrey, \$3.75. Copies of Constitution and By-Laws of the Club, 25 cents. Address, WM. H. LEGGETT, 54, East 81st Street, New York. Money Orders on Station K, N. Y. All subscriptions or orders filled only on receipt of the money. The Club meets regularly the second Tuesday of the month in the Herbarium, Columbia College at 7:30 P. M. Botanists are invited to attend. DR. THURBER the President of the Club may be found at 245 Broadway.
